***Client Notes for Bacatty Willis for 06/18/09:***

***Bacatty's Weight: 10 Lbs***

Reprint Client Notes online up to 30 days past your visit at [www.thefamilyvet.net](http://www.thefamilyvet.net).

Your (case-sensitive) password is: Willis

Bacatty is maintaining his weight at 10 pounds. His blood glucose was normal at 170; urine glucose was negative --- indicating he is NOT diabetic. Since he was doing well on prednisolone 5 mg --- 1 tablet once daily, we can try him back on it again and recheck the blood glucose in 2-3 weeks to make sure he is ok with it. If his blood glucose is high again, we may need to switch him over to budesonide for his GI problems.

We submitted urine culture to check for infection and should have results this weekend.

Unless problems, schedule a brief consult in 2-3 weeks for the glucose check..tnt
