### ***Client Notes for Barkley Conner for 06/10/09: Barkley's Weight: 23.1 Lbs***

Reprint Client Notes online up to 30 days past your visit at [www.thefamilyvet.net](http://www.thefamilyvet.net).

Your (case-sensitive) password is: Conner

Barkley looks great at 23.1 pounds. His left anal gland was moderate in size and the right one was very full. We emptied them both. The full anal glands were likely the cause of his anal itching. However, he also has allergies that may be a contributing factor. If his anal itching does not improve in a couple of days, we may need to pursue allergy treatment.

His ears and eyes are fine; no sign of infection.

Teeth are good.

Heart and lungs are clear.

We updated his distemper-parvo and bordetella vaccines. Let us know if any lethargy or soreness around his shoulders.

Please call with an update this weekend (regarding the itching around his rear); sooner if any problems..tnt
