Client Notes for Bella Seymour for 06/10/09: Bella's Weight: 9.25 Lbs

Reprint Client Notes online up to 30 days past your visit at www.thefamilyvet.net.

Your (case-sensitive) password is: Seymour

Bella is maintaining her weight at 9.25 pounds. She seems to be moving well. The way she hold / place her front legs may be a permanent feature or may change as she gets older. No sensitivity or pain noted on palpation.

We updated her rabies vaccine early for licensing requirement. Let us know if any lethargy or soreness around her shoulder.

We also trimmed the tips of her front nails.

Try not to brush her as hard or firmly. Use a lighter touch; that way the dead hair will be removed without risking damage to the good hair. Also try the skin supplements as discussed.

We are sending home several syringes of 3V caps. If no vomiting, we can order the liquid pump for her.

Rx: 3V Caps --- Give 1 pre-filled syringe orally once every other day as directed for skin.

Let us know if any vomiting or oily skin from the 3V caps.

Follow-up as needed --- if no problems, we will see her in October for her distemper-parvo and bordetella vaccines...tnt
