Diva regained some weight and is back at 62.1 pounds. We don't want her to regain more though. Her ears look fine. Monitor her RIGHT ear ---- there a small bleb that may be a start of another hematoma if she restart scratching or shaking her head excessively.

We trimmed the long nails on her front paw.

She is moving well with the Previcox. Keep her on the 1/2 tablet once daily for another week then if still well, try going to 1/4 once daily. If she does nto move as well on 1/4 once daily, we may need to put her back on 1/2 once daily.

Continue with the other medications as below:

1. Tramadol HCl 50 mg: 1+1/2 tablet twice daily.
2. milk thistle once daily
3. Chlorpheniramine 4 mg 2 tablets twice daily.

Also keep her on the flea control and medicated baths.

Unless problems, we will check her weight and anal glands in 6-8 weeks..tnt
