Wally gained about 3 pounds in the past month. He still looks great at 97.7 pounds. We will continue to monitor his weight; we may not want him to go over 100 pounds.

His skin looks good. No lesions / hairloss noted. Keep him on the monthly Promeris. Let us know if any problems.

We updated his distemper-parvo and bordetella vaccines. Call us if any lethargy or soreness around his shoulders.

Unless problems, schedule a treatment appointment in a month for his rabies vaccine..tnt
