### ***Client Notes for YiYi Leon for 06/14/09:***

***YiYi's Weight: 6.19 Lbs***

Reprint Client Notes online up to 30 days past your visit at [www.thefamilyvet.net](http://www.thefamilyvet.net).

Your (case-sensitive) password is: Leon

YiYi gained almost 2 pounds in the past month; he looks good at 6.19 pounds. His ears and eyes are fine; no sign of infection. Still puppy teeth. Heart and lungs are clear.

We gave the past of puppy series distemper-parvo vaccine; let us know if any lethargy or soreness around his hips. Since he is mostly indoors with minimal to no exposure to other dogs, we will not need to do the bordetella vaccines for him. Let us know if that changes so we can adjust his vaccine needs.

No fleas found today but can still start him on flea control since a flea was noted a thome.

Since you are not sure about neutering him, we will give the rabies vaccine in 3 weeks vs. waiting to do at time of suture removal.

Unless problems, schedule a treatment appointment for rabies vaccine in 3 weeks..tnt
